A perfect cover of I Will Always Love You. The song does justice to Freddie's incredible vocal range and power.

Frank Sinatra sings „Lose Yourself“ (Eminem)
Darth Vader sings „Demons“ (Imagine Dragons)
Johnny Cash sings „Barbie Girl“ (Aqua)

Warnung vor Fake-Video-Calls von „Innenminister Karner“

Das Bundeskriminalamt (BK) warnt vor einer neuen Masche mit Deepfake-Videokonferenzen mit dem vermeintlichen Innenminister Gerhard Karner (ÖVP). Die Kriminellen täuschen bei den Anrufen die Identität des Politikers vor, um Geldforderungen zu stellen. In mehreren Versuchen kam es bereits zu einem Gespräch mit dem falschen Minister, der um Lösegeldzahlungen im Zusammenhang mit Geiselnahmen bat.

Finance worker pays out \$25 million after video call with deepfake 'chief financial officer'

(CNN) — A finance worker at a multinational firm was tricked into paying out \$25 million to fraudsters using deepfake technology to pose as the company's chief financial officer in a video conference call, according to Hong Kong police.

The elaborate scam saw the worker duped into attending a video call with what he thought were several other members of staff, but all of whom were in fact deepfake recreations, Hong Kong police said at a briefing on Friday.

“(In the) multi-person video conference, it turns out that everyone [he saw] was fake,” senior superintendent Baron Chan Shun-ching told the city's public broadcaster RTHK.

The low-resolution image with the visible malicious prompt is passed on to the AI model, which may interpret the message as a legitimate instruction.

Trail of Bits demonstrated the potential impact of the attack by hiding a text instructing the AI model to exfiltrate the user's calendar data.

AI tools are increasingly integrated with other solutions, particularly in enterprise environments, and researchers regularly show how AI assistants can be abused for sensitive data theft and manipulation through hidden prompts.

Trail of Bits said its image scaling attack works against the Gemini command-line
